

## How to decompile files

1. When users have a \*.xob file to be decompiled to \*.mtp file, please click Tools -> Decompile.

2. After the Decompile dialog box pops up, please click Browse to open the desired file, and input the XOB password correctly.  
(Note: the XOB password created when compiling project)

- When decompiling file is finished as below, users can open the \*.mtp file for editing program.
