# Q.

How to update cMT-iV5 Firmware and OS?

This FAQ explains how to update cMT-iV5 Firmware and OS when some new features or bug fixes are added.

A.

Run "UtilityManagerEx.exe" file in the EB Pro installation folder. Click [cMT Series] » [Maintenance] » [cMT-iV5 OS Upgrade].

Two options for update can be found:

1. [Runtime (firmware)]: The file can be found in EB Pro installation folder \
   firmware folder. The latest firmware can be gained after downloading the
   latest EasyBuilder Pro. After download, select the HMI directly and click
   [Update].

2. [OS]: The file is not included in EB Pro installation folder. Please contact
   Weintek or your local distributor for assistance.
